PROFESSIONAL SUMMARY

I am an Information Technology graduate with knowledge in frontend development using React and TypeScript. I am also equipped with practical experience in building maintainable, responsive, and user-friendly interfaces for web applications. I have developed functional interfaces from designs, optimized performance for smooth user interactions, and collaborated with teams to deliver high-quality projects. I have the ability to work in collaborative environments, applying SDLC practices, and delivering efficient, scalable, and user-focused applications.

TECHNICAL SKILLS

Languages

- HTML5, CSS3
- JavaScript (ES6+)
- TypeScript

Other

- Debugging & System Issue Resolution
- Component-based Architecture

Frameworks & Libraries

- React.js
- Vanilla JS / Extract CSS
- Zustand (State Management)
- React Query (TanStack Query)

WORK EXPERIENCE

IT Trainee (Frontend Developer)

January 2026 – April 2026

Davao City Water District (DCWD) — Davao City, Philippines

- Developed UI components for the BCA CRM Module using React, TypeScript, and vanilla extract css.
- Built and maintained reusable frontend components aligned with company system requirements
- Provide assistance in debugging and resolving feature issues across internal web applications
- Collaborated with the development team to enhance overall system usability and user experience
- Supported implementation of responsive layouts and consistent UI styling across modules

PROJECTS

CRM System (Customer & Admin) (2026)

Users: Customer & Employee

Where it's used: Davao City Water District (DCWD)

- Developed a Customer Relationship Management (CRM) system with separate customer and admin interfaces using React and TypeScript. Customers use it to submit and track service requests, while employees manage records, update request statuses, and handle documents and transactions. The system improves workflow efficiency, data organization, and request processing

NDKC Attendance Monitoring System (Capstone Project 2025)

Users: Students & Faculty

Where it’s used: Notre Dame of Kidapawan College (NDKC)

- Developed a QR code-based attendance monitoring system using React and TypeScript, with Firebase as the database. The system enables automated time logging, efficient attendance tracking, and centralized record management for events and student participation.

Lost and Found System (2025)

Users: Students & Staff

Where it’s used: Notre Dame of Kidapawan College (NDKC)

- Developed a web-based lost and found system using React and TypeScript, with Firebase as the database. The system helps track lost items, manage reports, and improve item recovery within the campus.

Hospital Management System (2025)

Users: Hospital Staff & Patients

Where it’s used: School/Training Project (or specify hospital if real deployment)

- Developed a web-based hospital management system using React and TypeScript for the frontend, Node.js for the backend, and Supabase as the database. The system manages patient records, streamlines hospital processes, and improves overall data organization.

Judging App (2025)

Users: Judges & Event Organizers

Where it’s used: School Events & Mutya ng Lanao

- Developed a judging application using Flutter for mobile and web, with Firebase as the database. The system allows judges to input scores, manage criteria, and generate results efficiently.

Queuing System (2024)

Users: Cashiers & Student

Where it’s used: Notre Dame of Kidapawan College (NDKC)

- Developed a cashier queuing system using React and TypeScript to efficiently manage customer flow and organize transactions. The system helps reduce waiting time, ensures proper queue order, and improves the overall payment process experience

EDUCATION

Bachelor of Science in Information Technology

Notre Dame of Kidapawan College

2022-2026

ADDITIONAL SKILLS

Tools & Version Control

- Git & GitHub
- VS Code
- LazyGit

UI & Design

- Figma (Prototyping & Wireframing)
- Responsive / User-Friendly UI Design

Backend Development

- MySQL - phpMyAdmin
- NoSQL - Firebase
- PostgreSQL - Supabase
